

Forecast process: origin-state information is converted into a calibrated recent-loss prediction

Example origin: FAWN 335, 4 in, 2026-04-10; observed future soil moisture is intentionally not plotted.

b Online regime evidence

- Early transient
- Stage I-like
- Stage II-like

selected regime: Stage I-like

elapsed = 7.5 h; drop so far = 0.44 mm
evidence only; no future soil moisture
